

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

Format 1-Maternal Health Services

(Individual Interview-5)

Instructions: Information to be collected from a woman who had a delivery **in the last six months**. You need to undertake at least five interviews. Three of these must cover poorer and marginalized communities, while the remaining two with the women who had high risk pregnancy. For women who had institutional delivery, please interview those who had delivered in public health facility.

Name of the District:

Date of the interview:

Name of the block:

Name of the Sub Centre:

Village Name:

VHSNC name:

MCTS Number of the respondent mother:

--	--	--	--	--	--	--	--

Case of high risk pregnancy:

YES	NO
-----	----

Information collected by:

S.No	Question	Response		
		Good	Average	Poor
I	NUTRITION DURING PREGNANCY			
1.1	Take home ration received regularly from AWC	Regularly	Most of the times	Sometimes /Not at all
1.2	180 IFA tablets taken as per prescribed by ANM/doctor	Yes taken	Sometimes	Not taken/was not given by ANM or doctor
1.3	360 Calcium tablets taken as per prescribed by ANM/doctor	Yes taken	Sometimes	Not taken/was not given by ANM or doctor
1.4	Had regular adequate intake of food which included locally available vegetables, cereals, pulses, fruits, meat items, egg etc.	Yes, everyday	Most of the days	Few days only
II	SERVICES RECEIVED FROM HEALTH SERVICE PROVIDERS DURING PREGNANCY			
2.1	Have you done registration of pregnancy within first 3 months	Yes		No
2.2	Where did you get your pregnancy confirmed?	ASHA	ANM or Sub Health Centre	PHC
2.3	Did you avail services <u>at least two times</u> at 9 th of every month under PMSMA in the government health facilities?	Yes, two times	Only once	No, I was not aware
2.4	Received 4 Ante Natal checkups	Yes, all	Yes, three	Two or less
2.5	Blood pressure measured	Yes in all visits	Yes, in two visits	Not measured at all
2.6	Haemoglobin tested	Yes	Only once	No
2.7	Urine test done at least once	Yes		No
2.8	Abdomen examined	Yes	Only once	No

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

S.No	Question	Response		
		Good	Average	Poor
2.9	Weight monitored	Yes in all visits	Only once	No
2.10	Received Tetanus Toxoid injections	Yes		No
2.11	HIV/AIDS test done	Yes		No
2.12	Told about Expected date of delivery	Yes		No
2.13	Were you asked about any danger signs by ANM/doctor like - swelling, blurring of vision and severe headache or fever with chills etc.	Yes		No
2.14	Were you told that you had high risk pregnancy and referred to a doctor (<i>Only for the woman who had high risk pregnancy</i>)	Yes		No
2.15	Do you know why were you under high risk during pregnancy period (<i>Only for woman who had high risk pregnancy</i>)	Yes		No
III	COUNSELLING SERVICES RECEIVED			
3.1	Counseling for appropriate diet and rest	Yes		No
3.2	Counseling for institutional delivery and birth preparedness	Yes		No
3.3	Counseling on early initiation of breastfeeding	Yes		No
3.4	Counseling on contraceptives for spacing between two births like condoms, contraceptive pills, PPIUCD, and injectables (Antara)	Yes		No
IV	ENTITLEMENTS RECEIVED			
4.1	Received JSY benefits at the time of discharge	Yes		No
V	CARE DURING INSTITUTIONAL DELIVERY AND STAY IN HEALTH FACILITY (If delivered at home skip this section)			
5.1	Received free ambulance services to go to health facility for delivery	Yes		No
5.2	Received free medicines and diagnostics during admission in the facility for delivery	Yes		No
5.3	Received free meals regularly during your stay in the health facility	Yes		No
5.4	Received free ambulance services for drop back	Yes		No
5.5	Received free ambulance services for referral, if required	Yes/Referral not required		No
5.6	Received free blood, if required	Yes/Blood		No

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

S.No	Question	Response		
		Good	Average	Poor
		was not required		
5.7	Breastfeeding initiated within half an hour of the delivery	Yes		No
5.8	Stay in the hospital after delivery	48 hrs	24 hrs	Less than 24 hrs
VI	CARE DURING DELIVERY IF DELIVERED AT HOME			
6.1	Was delivery conducted by doctor/ANM?	Yes		No
6.2	Was newborn given bath immediately after birth?	No		Yes
6.3	Was breastfeeding initiated within half an hour of the delivery?	Yes		No
VII	CARE POST DELIVERY			
7.1	ASHA visited home in the first month of the delivery (in case of <u>institutional delivery</u> - 3,7,14,21,28 and 42 nd day of child birth) (In case of <u>home delivery</u> -In addition to the above on the first day of the delivery)	Yes	At least 3 visits	Not at all
7.2	Received free treatment in the government health facility for postpartum complications/problems like heavy bleeding, smelly discharge, feeding problem etc. if required	Yes/not faced any		No
7.3	Received take home ration from AWC regularly	Yes	Sometimes	No
VIII	AWARENESS AND COMMUNITY BEHAVIOUR			
8.1	Adopted any family planning method?	Yes		No
8.2	Have you heard of any maternal deaths (death of a woman during pregnancy period till 42 days after childbirth) in last one year?	No		Yes, maternal death(s) happened in family/locality/village/nearby village
8.3	Are you aware, that you can report any maternal death on 104 helpline?	Yes		No
8.4	Are you aware that you can report about pregnant woman with signs of weakness, swelling, short height, high blood pressure, pale look and poor nutrition etc (high risk) on 104 helpline so that appropriate help from state can be extended?	Yes		No
	Total in numbers Maximum score (42)			

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

Method to analyze the responses (Maternal Health services):

Step one: Count the number of greens, yellows and reds

Step two: Assess the overall rating for this format

- a) If number of Greens is 31 out of total 42 responses (i.e more than 75%), then overall rating is green
- b) If number of Greens is between 31 and 21 out of total 42 responses (i.e between 75%-50%) then overall rating is yellow
OR
If total number of Greens and Yellows are more than number of reds then overall rating is yellow
- c) If total number of Greens and Yellows are less than number of reds then overall rating is red.

Format 2-Child Health Services

(Individual Interview-5)

Instructions: Information to be collected from the mothers of children aged 0-2 years. You need to undertake at least five interviews. Three of these must cover poorer and marginalized communities, while the remaining two can be from the main village/dominant community.

Name of the District:

Name of the block:

Name of the Sub Centre:

Village Name:

Information collected by:

S.No	Question	Response		
		Good	Average	Poor
I	Newborn care			
1.1	Breastfeeding initiated within half an hour of the delivery	Yes		No
1.2	Was child given bath within one week of the birth	No		Yes
1.3	Was child breastfed exclusively for 6 months	Yes		No
1.4	When child was given complementary feeding?	On completion of 6 months	Between 7-8 months	Before 6 months or after 8 months
1.5	ASHA visited and checked newborn (in case of <u>institutional delivery</u> - 3,7,14,21,28 and 42 nd day of child birth) (In case of <u>home delivery</u> -In addition to the above on the first day of the delivery)	Yes		No
1.6	ASHA checked the child's temperature and	Yes		No

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

S.No	Question	Response		
		Good	Average	Poor
	umbilical cord for any bleeding on her visits to new born under HBNC			
II	Immunisation services received			
2.1	Is there a Village Health and Nutrition Day organized in your village every month	Yes	Sometimes	No
2.2	Child received BCG, Hepatitis B and polio drops on birth (for institutional delivery)	Yes, all	Only two or one	None
2.3	Child received all immunisation (BCG, Pentavalent, Polio drops, Measles, Japanese Encephalitis vaccines)	Yes, all	Received some	None
2.4	Child aged 9-12 months received first dose of Vitamin A	Yes		No
2.5	Children aged 16-24 months received- Booster doses of DPT & OPV; Second dose of Measles, Vitamin A, and Japanese Encephalitis	Yes, all	Only some	None
III	Childhood illness			
3.1	Who you contact first if the child has diarrhea/fever/respiratory problems etc.?	ASHA/ANM /AWW	PHC/BPHC	Private providers (quacks)
3.2	In case of the hospitalization of your child in a government facility (0-12 months), did you receive the following services:			
a)	Free ambulance service for reaching hospital	Yes		No/paid to Govt ambulance driver
b)	Free medicines and diagnostics	Yes		No
c)	Free stay and meals in the health facility	Yes		No
d)	Free ambulance for dropping back at home	Yes		No/paid to Govt ambulance driver
IV	Counseling and nutrition			
4.1	Is your child's growth monitored on monthly basis at the AWC?	Yes	Sometimes	No
4.2	Are you and your husband counseled on the growth and nutrition of your child by ASHA/AWW/ANM?	Yes	Sometimes	No
4.3	Received take home ration for the child (less than 3 years) from the AWC on a regular basis	Yes	Sometimes	No
V	AWARENESS AND COMMUNITY BEHAVIOUR			
5.1	Have you heard of any child death in the past one year?	No		Yes, child death(s) happened in family/locality/village/nearby village
5.2	Are you aware that you can report any child death on 104 helpline?	Yes		No
	Total in numbers			

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

S.No	Question	Response		
		Good	Average	Poor
	Maximum score (21)			

Method to analyze the responses (Child Health Services):

Step one: Count the number of greens, yellows and reds

Step two: Assess the overall rating for this format

- If number of Greens is 16 out of total 21 responses (i.e more than 75%) then overall rating is green
- If number of Greens is between 16 and 11 out of total 21 responses (i.e between 75%-50%) then overall rating is yellow
OR
If total number of Greens and Yellows are more than number of reds then overall rating is yellow
- If total number of Greens and Yellows are less than number of reds then overall rating is red.

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

Format 3-General Health Services

(Focus Group Discussion-2)

Instructions: Information to be collected from two groups of the individuals at the community level. Each group should consist of 10-12 members including males and females. One FGD to be done in the main village and one in the area where the disadvantaged group resides.

Name of the District:

Information collected by:

S.No	Question	Response		
		Good	Average	Poor
I	Availability of the health facilities			
1.1	Does Village Health and Nutrition Day organized regularly at AWC/school/any other place in your village	Yes	Sometimes	No
1.2	Do you have functional sub centre within half an hour distance from your village	Yes	Yes but farther	No
1.3	Is nearest primary health centre (PHC) functional 24X7?	Yes	Only during day time	No
1.4	Is nearest community health centre (CHC) functional 24X7?	Yes	Only during day time	No
II	Availability of the health services			
2.1	Nearest facility for delivery services for pregnant woman	SHC/PHC ¹	CHC	SDH/DH
2.2	Nearest facility for Immunisation of children and pregnant woman	AWC(VHND)	SC/PHC	CHC/SDH/DH
2.3	Nearest facility for treating childhood illnesses	SHC	PHC/CHC	SDH/DH and above
2.4	Nearest facility for treating general illnesses	SHC	PHC/CHC	SDH/DH and above
2.5	Nearest facility for basic diagnostic services like blood and urine test etc.	PHC	CHC/SDH	DH and above
2.6	Nearest facility for X-ray, Ultrasound etc.	CHC	SDH/DH	Medical college hospitals
2.7	Nearest facility for getting contraceptives like condoms and pills	ASHA/SHC	PHC	CHC

¹ SHC-Sub Health Centre or Sub Centre; PHC-Primary Health Centre; CHC-Community Health Centre; SDH-Sub District Hospital; DH-District Hospital

Assam-Community Action for health tool for monitoring high risk pregnancy, maternal and child death

S.No	Question	Response		
		Good	Average	Poor
III	Quality of care in health facilities			
3.1	Is ANM always available in the sub health centre?	Yes	Sometimes	No
3.2	OPD in PHC opens every day at the scheduled time	Yes	Sometimes	No
3.3	Have you been asked to purchase drugs/medicines from outside?	Yes	Sometimes	No
3.4	Are you satisfied with the services available at the health facilities?	Yes	Somewhat	No
3.5	Are you satisfied with the general behaviour of the health staff?	Yes	Sometimes	No
IV	AWARENESS AND COMMUNITY BEHAVIOUR			
	Maternal health			
4.1	How many families take pregnant woman to ANM/doctor for ante-natal checkups at the VHND or 9th of every month at the health facility providing PMSMA services?	100%	Between 100- 80%	Less than 80%
4.2	How many pregnant women are taken to the health facility for the delivery/child birth?	100%	Between 100- 80%	Less than 80%
4.3	How many women delivering in government health facilities receive JSSK benefits?	100%	Between 100- 80%	Less than 80%
4.4	How many women delivering in government health facilities receive JSY benefits at time of discharge?	100%	Between 100- 80%	Less than 80%
4.5	Are the ASHA and VHSNC members doing the follow-up and support the high risk pregnant mothers?	Yes, for all such cases	In some cases	None
4.6	Role of community and family members in caring for high risk pregnant woman	Satisfactory		Unsatisfactory
	Child health			
4.7	How many families in your village immunize their children?	100%	Between 100- 80%	Less than 80%
4.8	How many families in your village send their children aged 3-6 years to the AWC?	100%	Between 100- 80%	Less than 80%
	Maternal and child death			
4.9	Have you heard of any maternal death nearby in the last one year? (death of a woman during pregnancy)	No		Yes, maternal death(s) happened in family/locality/village/
